

This application is subject to the approval of the Big Sioux River Project (BSRP) Watershed Coordinator and the Minnehaha Conservation District (MCD) based on project priorities. You must obtain prior approval for any work planned to be eligible for cost-share.

- Marginal pastureland within the 100-year floodplain immediately adjacent to the Big Sioux River and its 303d impaired tributaries will be eligible for the SRAM program. Eligible streams will be determined by the Watershed Coordinator and the South Dakota Department of Agriculture and Natural Resources (SD DANR). Enrolled acres shall not be grazed April 1 through September 30.
- A minimum buffer width of 30 feet and an average maximum width of 120 feet from top of bank will be used to determine eligible acres of the buffer unless the 100-year floodplain exceeds 120 feet. In cases where the 100-year floodplain exceeds the 120-foot distance, the additional acres immediately adjoining the 120-foot buffer may be enrolled to the extent of the 100-year floodplain.
- Haying will be allowed through the summer months and bales should be removed before inclement winter weather prevents removal which at no time shall be later than November 15. Haying cannot begin until after June 15.
- The MCD, BSRP Watershed Coordinator, and associated partners will be granted access and allowed to inspect the SRAM acres enrolled on the property listed above throughout the lifespan of the program. Vegetative spot checks to verify program compliance will be conducted at various times during the contract term on land enrolled in the program. A minimum vegetative stand of 4-6 inches shall be maintained.
- A payment rate per acre is determined based on location within the watershed. Additional land outside of the 100-year floodplain immediately adjoining the eligible acres offered may be eligible and paid 50% of the per acre rate to square up field boundaries. These acres shall only equal a maximum of 25% of the total acres offered.
- All invoices and receipts must be submitted to the BSRP to be eligible for cost-share reimbursement. If applicable, 75% of actual cost for grass planting and trees/fabric will be provided. Trees and fabric shall be capped at \$10,000.00. Alternative water shall be provided if grazing is carried out after September 30.
